Dear Hiring Manager,

I am writing to inquire any relevant vacancies in your firm. Enclosed is my resume for your kind attention.

As you will see from my resume, I have substantial training, capabilities and experiences as an electrical engineer particularly in the ship-building industry. Your firm may provide services that I have experience with, in a variety of capacities. I believe my familiarity with the industry would make me an asset to your company.

But what really sets me apart from the others and will definitely make me a valuable addition to your team is my ability to combine that with my people skills. I have developed excellent communication skills from working directly with senior managers, vendors and developers, which means I am well-prepared to work on high-profile, cross-departments projects from day one.

I have excellent references and would be delighted to discuss any possible vacancy with you at your convenience. In case you do not have any suitable opening at the moment, I would be grateful if you would keep my resume on file for any future possibilities.

Do not hesitate to contact me via my mobile number or email as stated above. I look forward to hearing from you soon.

Yours Sincerely,

ADAM GAU

(ADAM GAU ANAK SIMER)
