ELECTRICAL ENGINEERING INTERN

COVER LETTER

Dear Sir/Madam,

I would like to apply **Electrical Engineering Internship** position at your company from **12 February 2017 to 16 June 2017**. I am currently an undergraduate of Electrical Engineering at Universiti Kuala Lumpur British Malaysian Institute (UNIKL-BMI) and will be graduating in October 2017. I firmly believe an internship with your company would provide me with the right exposure of engineering environment and learn more about power systems and design standards.

My coursework during my undergraduate semesters have included multiple classes on the power system & electronic engineering and I am very capable of applying this knowledge to real world products, as demonstrated in my final year project entitled Development of Arduino Robot Control System via Android Environment. I am well competent to collect and analyze data then present my findings in detailed reports. I am also an organized critical thinker with the ability to look at data and see the larger picture it presents.

I would love to fill internship position with your company. Looking forward for your feedback.

Please contact me for an interview. Thank you for your time and consideration.

Sincerely,

Ahmad Azeem Bin Awang

OBJECTIVE

I am a talented person looking for an internship opportunity that enable me to establish myself in the field of electrical engineering. I have a solid educational foundation and focused on putting my research, university studies and knowledge to practical, applied use in Power Systems Engineering. I am results-driven and able to apply fundamentals of electrical engineering science especially in field of power system analysis, operations, protection and controls. I firmly believe i will be an asset to help the company to achieve their mission, vision, and values.

EDUCATION

UNIVERSITI KUALA LUMPUR BRITISH MALAYSIAN INSTITUTE (UNIKL-BMI) 2013 - Present

*Bachelor's Degree of Engineering Technology in Electrical
Major in Electrical. CGPA: 3.02*

*Research on Development of Arduino Robot Control System via
Android Environment*

PENANG MATRICULATION COLLEGE

2012-2013

*Foundation Studies in Science (Physics)
Second Class Honours*

CORE STRENGTHS

My key strengths include:

- Power System
- Power Quality
- Power Electronics
- Electrical System in Building
- Optoelectronic Devices
- Renewable Energy
- Automation and Robotics
- Microcontroller and Interfacing
- Electrical Machine and Drives
- Project Management

AWARDS

CURRICULUM

2015 - Champion - Robot Arm Competition for Automation & Robotics
UNIKL-BMI

COCURRICULUM

2016 - Champion - UNIKL Sport Carnival Basketball Tournament
2015 - 1st Runner Up - GMI Open Basketball Tournament
2014 - 2nd Runner Up - Selangor MSS Basketball Tournament
2011 - Gold - 4x400m Sprint Athletics for Men U-17
