PROJECT MANAGEMENT & CONSULTING

Solving Problems by Building Relationships

Project Engineer holding a masters in Sustainability Engineering (distinction) with 3+ years experience in operational risk management, negotiation and supplier coordination. Looking to leverage skills in stakeholder engagement, project management and project planning into a junior project engineer role. Core competencies include:

**Project Management • Stakeholder Engagement • Supplier Management • Business Development
Operational Risk Management • Contracts Negotiation • Strategic Planning**

PROFESSIONAL EXPERIENCE

Technip Geoproduction Sdn Bhd – Malaysia – technipfmc.com

One of the global leaders in subsea, onshore/offshore and surface projects specializing in Project Management, Engineering and Construction for the energy industry.

Project Engineer (HSED)

02/2015 – 01/2017

- Involved in project implementation, planning, supervising, installation, commissioning and inspection.
- Identified and mitigated operational risks.
- Identified opportunities to enhance design and increase profitability.
- Performed stakeholder analysis and mapping to determine stakeholder engagement strategy.
- Presented technical proposals to management and Client.
- Experienced in reviewing Tender/ITB/Proposal documentation.
- Primary contact for all supplier queries, vendor requests and design changes.

Key Achievements:

- ✓ Maximized budget by eliminating over-design and quantity of fire-detection equipment. 10% reduction in equipment purchase cost - approximately RM 700,000 savings for company.
 - ✓ Nominated by Project Manager as the youngest HSED project lead for cross-functional role to undertake both review of technical design as well as overall project management activities.
 - ✓ Successfully led project 3 months ahead of schedule within allocated budget.
-

Risk and Safety Consultant

10/2013 – 02/2015

- Prepared safety drawings, technical reports, technical specification/ datasheets.
- Prepared HSE Design Frameworks and Procedures.
- Developed a safety critical baseline for the design of equipment for oil platforms.
- Conducted risk analysis and mapping studies of various proposals to determine safest method.
- Provided recommendations to clients and team-members on fire & risk assessments, explosion analysis and safety critical elements.

- Prepared feasibility study and cost-benefit analysis of proposals to determine which is the most efficient and cost effective.

Key Achievements:

- ✓ Awarded 'Top Achiever' status above all other employees in Technips Graduate Development Programme.
- ✓ Proposed by HOD for the role of project lead temporarily. Successfully delivered project milestones (7 technical drawings and 2 reports) between the period of Nov 2014 – Jan 2015.

Intran Technologies Sdn Bhd – Malaysia - intran-mrkt.com

Involved in the supply of basic laboratory equipment and provision of engineering competencies in the areas of Bioprocess Engineering and Biotechnology, Chemical Reaction Engineering

Graduate Chemical Engineer (Sales)

09/2012 – 09/2013

- Responsible to ensure projects completion on time, within budget
- Provided product engineering information needed for proposals.
- Monitored competitor products, Sales and Marketing activities.
- Generated leads and following up with potential clients for business development opportunities.
